DETAILED ACTION

Drawings

- The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims.

-- In reference to claim 1, line 6 the recitation "directions that are orthogonal to each other" is considered to be vague and indefinite. Examiner interprets orthogonal directions as being two axes (e.g. x-axis and y-axis) intersecting at a common point forming a right angle. According to Remarks (Papers dated 04/16/2007, page 7 line 14-18) applicant explained the claim limitation of orthogonal direction is achieved by the axial and rotational movement of the inner cylinder. It is unclear as to where the radial movement intersects the axial movement to be orthogonal.

-- The above feature(s) must be shown or the feature canceled from the claim. No new matter should be entered.

- **Please note that drawing corrections will no longer be held in abeyance. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application.**

Claim Objections

- The following claim(s) is/are objected to because of the noted informalities:

Claim(s) 1-20 is/are objected to under 37 C.F.R. Rule 1.75 (d)(1). The terms and the phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description. In particular, reference to claim 1, line 6 the recitation "directions that are orthogonal to

each other" is considered to be vague and indefinite. Examiner interprets orthogonal directions as being two axes (e.g. x-axis and y-axis) intersecting at a common point forming a right angle. According to Remarks (Papers dated 04/16/2007, page 7 line 14-18) applicant explained the claim limitation of orthogonal direction is achieved by the axial and rotational movement of the inner cylinder. It is unclear as to where the radial movement intersects the axial movement to be orthogonal.

- Appropriate response to the above is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

-- In reference to claim 1, line 6 the recitation "directions that are orthogonal to each other" is considered to be vague and indefinite. Examiner interprets orthogonal directions as being two axes (e.g. x-axis and y-axis) intersecting at a common point forming a right angle. According to Remarks (Papers dated 04/16/2007, page 7 line 14-18) applicant explained the claim limitation of orthogonal direction is achieved by the

axial and rotational movement of the inner cylinder. It is unclear as to where the radial movement intersects the axial movement to be orthogonal.

Conclusion

The prior listed on PTO form 892 that is made of record is considered pertinent to applicant's disclosure because it shows the state of the art with respect to applicant's claimed invention.
